# My Aim in Life: Doctor

Paragraphs in 50, 100, 150 & 200 Words

*Simple, student-friendly writing for school exams and homework*

## 50 WORDS My Aim in Life: Doctor

My aim in life is to become a doctor. Doctors save lives and ease the pain of the sick. Many poor people cannot afford treatment, and I want to help them. I will study hard, be kind to every patient, and serve my country as a good and honest doctor.

## 100 WORDS My Aim in Life: Doctor

Having an aim is very important for success. Aim is the purpose of our life. It helps us to work hard and move forward. My aim is to become a doctor. A doctor is a great person. Doctors serve humanity and save lives. I respect doctors.

I want to become a doctor because poor people cannot afford treatment. I want to treat them for free and make them healthy and happy.

Doctors work hard day and night for patients. They are kind and caring people. I will study hard and learn about the human body. One day, I hope to bring comfort and better health to many families.

150 WORDS

## My Aim in Life: Doctor

Every successful person has a clear purpose that motivates his life forward. That purpose is called aim. It gives meaning to our struggle and keeps us from wasting time on useless activities.

My aim in life is to become a doctor. Doctors are respected heroes who serve people selflessly. They give their time and energy to save precious lives and reduce human pain. In our country, many people still die due to lack of treatment.

I want to become a doctor to help patients who cannot pay heavy hospital bills. I dream of opening a small clinic in my village where I will treat everyone with care and provide free medicines. A doctor's smile can give hope to a suffering patient.

This profession requires hard work, intelligence and a kind heart. I will study science with full focus and stay honest to achieve my aim and serve my nation proudly.

200 WORDS

## My Aim in Life: Doctor

An aim in life gives shape and purpose to our way of life; it turns dreams into plans and plans into reality. As the saying goes, "The best way to find yourself is to lose yourself in the service of others." A person without an aim lives like a ship lost at sea, never reaching its destination.

My aim in life is to become a doctor, not for money or fame, but for the noble cause of serving suffering humanity. In our country, thousands of poor families suffer because they cannot afford expensive treatment. Seeing their pain has moved my heart deeply.

Hospitals are not just buildings; they are temples of hope where life is given a second chance. I want to be the doctor who brings comfort to a crying mother, who saves a child from fever, and who gives free medicine to the needy. I dream of establishing a charity hospital in my hometown.

This path requires a lot of hard work. I know I must study science subjects with full focus and spend endless hours preparing. More importantly, this profession needs a heart full of patience, kindness, courage, and honesty. I am ready to work tirelessly because saving a single life is far more valuable than all the wealth in the world.

## Facts About Doctors & Healthcare

1. The World Health Organization projects a shortfall of about 11 million health workers by 2030, mostly in low- and lower-middle-income countries. **[WHO]**
2. Pakistan had 336,582 registered doctors in 2025, up from 319,572 in 2024. **[Economic Survey]**
3. The infant mortality rate in Pakistan is 47 per 1,000 live births, compared with 23.2 in South Asia as a whole. **[Economic Survey]**
4. The federal development (PSDP) allocation for health was just Rs19.37 billion in the Economic Survey 2025–26. **[Dawn]**
5. In September 2026, the WHO warned that about one in four doctors worldwide is expected to retire within the next decade. **[Reuters]**
