Save Water, Save Life

Paragraphs in 50, 100, 150 & 200 Words • with Facts & Sources

Save Water, Save Life

50 WORDS

Water is precious, and every drop matters. I am Aqua Kid, and I protect water every day. I close the tap while brushing my teeth and ask my family to fix leaking taps. Water gives life to people, plants, and animals. Let us all protect it. Save Water, Save Life!

Save Water, Save Life

100 WORDS

Water is my superpower! I am Aqua Kid, a protector of every drop on Earth. I never waste water while brushing my teeth or taking a bath. I close the tap whenever I use it. I also remind my family to fix leaking taps at home and school. I collect rainwater with an adult's help to water my green plants and help them grow. Every drop helps birds, trees, and people. We all need water to live, so we must protect it. Join my Aqua Team and become a Water Hero today! Remember my magic slogan: Save Water, Save Life!

Save Water, Save Life

150 WORDS

Hello, friends! I am a Water Detective on a mission to save our water. My job is to find where water is wasted at home and school. Did you know that most of Earth's water is salty, while much of its freshwater is frozen or difficult to access? That is why we must use clean water wisely. I have an action plan! I turn off the tap while brushing my teeth and take quick baths without wasting water. I encourage my family to wash vegetables in a bowl and reuse the leftover water for plants, when suitable. I also remind everyone never to throw rubbish into rivers or drains. As a Water Detective, I know that small actions can make a difference when we practice them every day. Will you join my mission? Let us work together to protect water for the future. Every Drop Counts! Save Water, Save Life!

Save Water, Save Life

200 WORDS

Listen up, Young Water Guardians! Our planet needs us to protect its precious water resources. Water is a blessing from Allah and is essential for all living things. The Holy Quran reminds us of the importance of water in Surah Al-Anbiya (21:30), which says that Allah made every living thing from water. Therefore, we should use this blessing wisely and avoid wasting it.

Leaking taps, careless water use, and pollution threaten our water resources. At home, we can report leaking taps to adults, turn off taps when they are not needed, and use buckets instead of leaving hoses running. At school, we can make posters, form a Water Guardian Club with our teachers, and encourage classmates to adopt water-saving habits.

We can also collect rainwater with adult supervision for suitable activities such as watering gardens. We must keep rivers, lakes, and drains free from rubbish to protect the environment. Imagine children across Pakistan practicing these habits and teaching their families to do the same. Every child can contribute to this important mission through small actions. Let us make a promise: we will not waste water, and we will encourage others to protect it too. Save Water, Save Pakistan, Save Life!

Did You Know? 5 Water Facts

1. About 96.5% of Earth's water is in the oceans. Only about 2.5% is freshwater, and much of that is frozen or underground. **[USGS]**
2. A tap that drips once every second can waste more than 3,000 gallons (over 11,000 litres) of water in a year. **[EPA]**
3. World Water Day is celebrated every year on 22 March to remind everyone why freshwater matters. **[UN-Water]**
4. Around 2.1 billion people, about 1 in 4 worldwide, still do not have safely managed drinking water. **[WHO/UNICEF]**
5. Pakistan's water availability has fallen below the scarcity threshold of 1,000 cubic metres per person. **[PCRWR]**

Be a Water Hero: 6 Easy Actions

- Close the tap while brushing your teeth.
- Take quick baths and showers.
- Never throw rubbish into rivers or drains.
- Tell an adult about any leaking tap.
- Reuse leftover vegetable-washing water for plants, when suitable.
- Teach one friend or family member the slogan.
